

This table shows how to have millions of extra smiles in the world.

*There will be some people that love to smile, and some won't be interested, but those that love it will make up for those who won't or can't smile.
Remember no one needs a smile more than someone who can't or won't smile.*

Table one, People smiling at 3 people each day and that continues for everyone for the month.

Examples

1st day, 1 person smiles at 3 people, equals 3 smiles, therefor 3 extra smiles in the world
2nd day, those 3 people from the 1st day smile at 3 people, equals 9 smiles, therefor 9 extra smiles in the world.

Table two, People smiling at 3 people only once
 Even if the original people don't keep smiling, the results are still over 4 billion extra smiles in the world. It works like this.

Examples

3rd day 12 people smile at 3 people, equals 36 people and extra smiles.
4th day the previous 36 people less the days initial amount of people of 12 equals 24. Those 24 smile at 3 people which equals 72 extra people and smiles.
